

I love my XM radio! I don't even bother to listen to AM/FM stations anymore. I also love my instant traffic and weather reports. You can't get the quality on regular radio that you get from XM. It doesn't matter where I go, I know exactly what station to tune in to for the latest traffic and weather updates. If I'm starting in Atlanta and driving to Chicago, I don't have to waste time being distracted searching for a radio station. I can easily program them right into my XM radio and press a button when I'm ready for a specific city. Please reject the NAB's petition 04-160. To allow the NAB to interfere in the wonderful programming on XM would be a true injustice.

Sincerely,

Jennifer Fowler-Proud member of the XM nation!
